OBJECTIVE

A results-driven and enthusiastic CSE (AIML) student seeking an SDE intern role to gain experience and expand my knowledge in software development. I am excited To contribute to a collaborative team, using my skills in data structures, algorithms, and full-stack development to build innovative solutions.

EDUCATION

Galgotias University

B.Tech - Computer Science and Engineering (AIML) CGPA: 8.5

2022 – 2026

Greater Noida

St. Joseph Public School

2021

Class 12th - CBSE Board Percentage: 75.6%

Begusarai

B.R DAV Public School

2019

Class 10th - CBSE Board Percentage: 85%

Begusarai

EXPERIENCE

AWS CLOUD INTERNSHIP — Eduskills Academy

October - December 2024

- Deployed and managed scalable applications using AWS services like EC2, S3, Lambda, and RDS.
- Automated infrastructure provisioning using AWS CloudFormation and Terraform.
- Monitored application performance and logs using CloudWatch and AWS X-Ray.
- Implemented secure authentication and access control using IAM roles and policies.

Google AIML INTERNSHIP — Eduskills Foundation

April - June 2025

- Developed and deployed machine learning models using Python and popular AI/ML libraries such as TensorFlow and Scikit-learn.
- Built and integrated AI/ML solutions with cloud-based platforms, leveraging AWS services (EC2, S3, Lambda, RDS) for scalable deployment.
- Monitored model deployment performance and logs using CloudWatch and AWS X-Ray.
- Implemented secure authentication and access control for AI applications using IAM roles and policies.
- Gained hands-on experience in data preprocessing, feature engineering, and model evaluation.

PROJECTS

Automated academic grading and computation | JAVA

2023

- Developed a Java-based SGPA Calculator with a Swing GUI interface for academic grading automation.
- Implemented features for subject input, credit handling, and dynamic SGPA computation using MySQL backend.
- Built using Java Swing, MySQL, and Eclipse IDE.

Full-Stack Auction Platform | Node.js, MongoDB, JavaScript

2025

- Engineered a web-based auction platform with a responsive frontend built using React and a backend powered by Node.js .
- Designed and implemented a MongoDB schema to efficiently store user data, auction items, and bids.
- Integrated secure user authentication, utilizing bcrypt for password hashing and JWT for stateless session management.
- Added Nodemailer integration to provide real-time email notifications for bid updates and auction outcomes.

Automate emotion detection from text | Numpy,pandas,scikit-learn,flask

2025

- Developed a machine learning pipeline to detect emotions (joy, anger, sadness, etc.) from text using Python.
- Preprocessed and vectorized text data using scikit-learn's TF-IDF, trained classifiers (Logistic Regression, SVM, Neural Network).
- Built and deployed a web application with Flask for real-time emotion detection.
- Technologies: Python, scikit-learn, Flask.

TECHNICAL SKILLS

Programming Languages: Python(primary), Java, C++, JavaScript, SQL

Web Technologies: HTML5, CSS3, JavaScript, React.js, Node.js

Databases: MySQL, MongoDB

Cloud and DevOps: AWS (EC2, S3, Lambda, RDS),GitHub

AIML Tools and Libraries: TensorFlow, PyTorch, Scikit-learn, Jupyter Notebook, Pandas, NumPy

Developer Tools: VS Code, PyCharm, Postman, IntelliJ IDEA

Automation and Process Improvement: AWS CloudFormation,Terraform,Python libraries for automation

Other Skills: RESTful APIs, Spring Boot, Data Structures And Algorithms

CERTIFICATIONS

- Python Essentials 1 and 2 - Cisco Networking Academy
- Compiler Design - NPTEL
- CCNA: Introduction to Networks - Cisco Networking Academy
- GeeksforGeeks API BootCamp - Sponsored by Postman

EXTRACURRICULAR

- Participated in the **Techdesk Hackathon**; developed an AI-powered chatbot focused on mental health awareness and support.
- Participated in the **LAUNCHPAD Hackathon**; Developed an automated Sensor model focused on Detection of the level of Garbage inside the dustbin and give signal to Cleaner Nearby location.
